1.2 Software Setup Notes

■ Workstation

This course was created using Windows 8 Professional as the operating system. Other operating systems described above may be used and should not impact the flow of the course.

This course was created with a complete installation of Office Professional Plus 2013. If desired, you may save disk space by installing only the more common applications. Excel and PowerPoint specifically are launched during the class session.

The workstation should be configured to connect to the Internet to accommodate the exercise in section **1.1 Viewing Web Pages and Favorites**.

The workstation should be configured with a printer driver.

■ Servers

This course was created using a dedicated server running Windows Server 2012 with an active directory, and Exchange 2013.

To accommodate a classroom setting, setup generic user accounts, for example, User01 to User10. An “Instructor” account may be beneficial as well, although it is not referenced specifically in the course.

1.3 Classroom Data

Run the class data archive **C152en_data.exe** for this course to install the class data to the **C:\C152en_data** folder. The table below indicates the classroom data files that are included in the archive, as well as the section in which the file is first opened for use.
